

Pinpoint MapSeries

Pinpoint MapSeries is a web application that provides end users with a powerful yet easy to use tool for creating a geographically rich PDF Map Series Report

Examples of subject matter suitable for a Pinpoint MapSeries config file:

- Planning Maps
- Utilities Maps
- Hazards Maps
- And many more!

Each page can contain combinations of maps and/or data derived from local data sources or via web services.

One or more Templates referenced by the config file define the page layouts required throughout the PDF Report.

Foreign PDF documents can be inserted at any point either as defined pages, page ranges or an entire PDF document.
